

## Highway 200A Structural Plate Repair | Hillsboro, ND

### Structural Plate Repair Inlet Ends of Structural Plate Pipe Replaced

#### Owner

Trail County

#### Contractor

KPH Contracting

#### Consulting Engineer

North Dakota DOT

#### Application

Replacement of damaged inlet ends on existing structural plate pipe culvert

#### Why structural plate from TrueNorth Steel?

Structural plate is highly adaptable, durable and easily installed in difficult locations. Structural plate is available in many shapes and sizes to meet virtually any project requirements.

#### Project challenges

Ice had damaged the 1977 installation during spring flooding in 2009. The inlet ends of this double barrel 12 gauge structural plate pipe easily and quickly replaced.

#### Special/unique elements of the project

North Dakota DOT designed slope protection to prevent the ice damage.
