

Hot Springs Creek | Hot Springs, MT

EcoArch with Corrugated Steel Footing Pads

Owner

Confederated Salish & Kootenai Tribes

Contractor

Confederated Salish & Kootenai Tribes

Consulting Engineer

Confederated Salish & Kootenai Tribes

Application

Removal of existing culverts to replace with a bottomless EcoArch to allow migration of Westslope Cutthroat Trout

Why this product from TrueNorth Steel?

Installation was completed with an excavator. The EcoArches are preassembled and easy to install.

Project Challenges

This was a very remote project site.

Special/unique elements of the project

The EcoArches were delivered to a location and had to be carried with an excavator to the job site due to narrow roads.
