

Third Street Bridge | Keystone, SD

6' X 80' Pedestrian Bridge with SuperSill™ Pre-Engineered Abutment System

Owner

City of Keystone, SD

Contractor

Timberline Builders

Consulting Engineer

Renner Associates, LLC

Application

A new pedestrian bridge crossing next to a vehicle bridge

Why modular steel bridges from TrueNorth Steel?

SuperSill™ provided accelerated construction of abutments and minimized disruption of the streambed. TrueNorth met with city team members and developed the plan to utilize SuperSill™.

Special project elements

TrueNorth Steel partnered with city team members to coordinate installation and the city was so satisfied with the product they purchased a second (6' X 70' pedestrian) bridge two years later.
