

Decker Coal Mine Drag Line Crossing | Decker, MT

CSP 84" Dia. X 130'
10 Ga. 5X1 Corrugation

Owner

Decker Coal Mine

Contractor

Mine Installed

Engineer

Decker Coal Mine

Application

Drag line crossing which allowed passage to the other side of the creek.

Why this product versus others?

TrueNorth Steel was able to supply 65 lf sections of corrugated steel pipe providing only two pieces per run. This minimized installation time and cost.

Project challenges

The live load effects from the drag line were very large but were easily handled by the 10 gauge corrugated steel pipe.
