

City of Oxbow Flood Protection | Oxbow, ND

Aluminized Steel Type II, Coated CSP Water Control Structures

Owner

City of Oxbow, ND

Contractor

KPH Contracting

Consulting Engineer

Moore Engineering

Application

Control of flood water back-up into the city storm sewer system

Why this product versus others?

The current city sewer system was made up of a mixture of pipe conduits, corrugated steel pipe was easily adapted to connect with them

Project challenges

Fitting the control structures into the existing storm sewer lines

Special project elements

Requirement of providing the ability to minimize flood water backing up into the city storm sewer system. System incorporated water control gate.

Additional TrueNorth Steel products used

Waterman C-10, C-20 canal gates; Perma Dry protective coating
