

O'Reilly Auto Parts Detention System

| Ham Lake, MN

72" Dia. Underground Detention System Aluminized Steel Type II

Owner

O'Reilly Auto Parts

Contractor

Gustafson Excavating, Inc.

Consulting Engineer

City of Ham Lake, Minnesota

Application

Detention system Aluminized Steel Type II Corrugated Steel Pipe

Why this product versus others?

Lower installed cost versus plastic or concrete systems

Project challenges

The site was very tight and there was very little workspace

Special project elements

Originally the project bid specified a different pipe material. The contractor was approached regarding using corrugated steel pipe as a value engineering alternative. The lower installed cost of the corrugated steel pipe system allowed the contractor to win the project.
