

Banks Oilfield Tanks | Banks, ND

24 - 750BBL Oil Storage Tanks with TrueContain™ Containment System and Catwalk System

TrueNorth Steel solution and products used in application:

Oilfield operator contacted TrueNorth Steel to provide a multiple product solution for a project they were building in Banks, ND. The request consisted of tanks, custom catwalk, and two separate containment areas.

The delivery and installation of our patented TrueContain™ Containment Systems was facilitated by our experienced installation team. The TrueWalk Catwalk system allowed the customer to reduce total installation time and provided required customization. The ease of installation and designed flexibility saved the customer valuable time in the field.

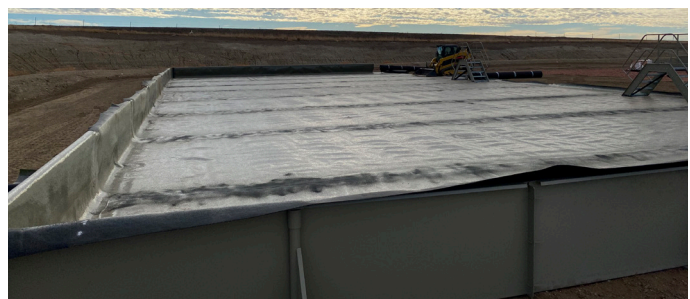

The tank and catwalk deliveries were organized over multiple days by TrueNorth Steel's logistics company. The products were delivered on time, staged at location, and arranged in the requested order to minimize downtime at the location.

The turn key solution provided to the customer resulted in multiple benefits. The customer was able to save time and focus on the additional required tasks at the location.

The entire project was completed ahead of time and exceeded the customer's expectations. The customer was extremely happy to be ahead of the projected schedule for this portion of the project.
