MENIFEE JUSTICE CENTER

LOCATION	SIZE	CONTRACT VALUE	SCOPE
Menifee, CA	752 Tons	\$6,148,000	Structural Steel Stairs Miscellaneous Metals

This southern California courthouse project required three stories of structural trusses plus metal stairs and decking equating to 752 tons of steel, largely prefabricated in TrueNorth Steel's Lubbock, TX location. TrueNorth Steel's project managers worked closely with the consulting engineering firm to meet the challenge of delivering and erecting the steel to accommodate an accelerated delivery schedule per customer request. The accelerated delivery was made possible in part by TrueNorth Steel's in-house shipping and logistics expertise.

In Partnership with Clark Construction.
