CLIMATE PLEDGE ARENA & PARKING GARAGE

LOCATION	SIZE	CONTRACT VALUE	SCOPE
Seattle, WA	2,719 Tons	\$5,500,000	Structural Steel Miscellaneous Steel

This extensive redevelopment will reposition the venue as the premier sports and entertainment destination in the Northwest. The 18,100-seat arena will feature a completely redesigned interior with new clubs and social spaces, all while preserving the history of the site.

Climate Pledge Arena is aiming to be the first International Living Future Institute Zero Carbon certified professional sports venue in the world. The institute's Zero Carbon Certification requires 100% of the energy used to operate the building be offset by new renewable energy. In addition, all of the embodied carbon emissions associated with the construction and materials of the project must be disclosed and offset.

In Partnership with LeJeune Steel Company and Mortenson.
