MISSION VIEJO MEDICAL OFFICE BUILDING

LOCATION	SIZE	COMPLETION DATE	SCOPE
Mission Viejo, CA	785 Tons	2019	Structural Steel Miscellaneous Steel SidePlate Steel Erection Detailing Project Management

The Mission Hospital Comprehensive Cancer Institute will span 104,000 square feet across four stories. The building, which includes extensive medical office space as well as a new parking garage, will reduce travel times for those in need of cancer treatment. TrueNorth Steel benefited the project in a number of ways, including pre-construction and project management services, 3D steel detailing, building information modeling coordination, structural and miscellaneous metals fabrication and steel erection.

In Partnership with Snyder Langston.
