

COMMERCIAL ROCKY VISTA UNIVERSITY

LOCATION	SIZE	COMPLETION DATE	SCOPE
Billings, MT	795 Tons	Fall 2021	Structural Steel Miscellaneous Metals Joist and Deck Steel Erection Gluelam Installation

Rocky Vista University has a new home for their medical college program in this 2-level, 145,000 square foot facility in Billings, MT. TrueNorth Steel was approached to bid this project in March of 2021 with contract drawings at a 50% design development stage. The project schedule required that the steel structure started to go up in August of 2021. However, due to supply chain disruptions and labor shortages brought on by the COVID-19 pandemic, 2020 and 2021 were challenging times for sourcing raw material on time and on budget.

Despite these challenges, TrueNorth Steel worked diligently to provide solutions and was ultimately selected as the steel subcontractor based on our ability to provide design assistance (including connection selection and modeling), produce shop drawings as the design was being developed, secure cost of raw material in a very short timeframe, and fabricate the steel in a very limited window of time—all while controlling costs to keep the steel scope in budget.

In Partnership with Langlas & Associates.
