BOZEMAN HEALTH ICU/OR EXPANSION

LOCATION	SIZE	COMPLETION DATE	SCOPE
Bozeman, MT	1,100 Tons	2021	Structural Steel Miscellaneous Metals Decking Steel Erection

This addition to the Bozeman Deaconess Hospital included a new 20-room ICU unit, expansion to the current operating room wing, two new full-height egress stairs, and a monumental stair and entryway expansion. TrueNorth Steel provided value add to this project with our long-standing relationship with CTA, the project EOR. We provided timely deliveries and our operations did not impact the live ICU or hospital operations. Unique aspects of the project include a radius steel moment frame entryway with 2" threaded rod assemblies and bolted moment connections.

In Partnership with Layton Construction.
