Rapid City, SD	2,800 Tons	2019	Preconstruction Detailing Connection Design Structural Fabrication Miscellaneous Metals Joist and Deck Steel Erection SidePlate®

Rapid City Regional Hospital's renovation and expansion project is the largest in its 45-year history. The \$200-million project involved renovating the hospital as well as building a new main entrance, hospital office building, and parking structure. The project also expanded the emergency department. TrueNorth Steel assisted in several ways, including preconstruction and project management services, 3D steel detailing, building information modeling, structural and miscellaneous metals fabrication, and steel erection.

In Partnership with Layton.
