

TrueStair™

**SIMPLIFY YOUR
STRUCTURAL
REQUIREMENTS**

COMPLETE STAIR SYSTEM SOLUTION

TrueStair® is an economical, prefabricated stair system designed specifically to reduce time designing, fabricating and installing stairs in commercial or industrial applications.

TrueStair is suitable for both remodels and new construction projects. Product specifications and details are available for download on demand. Additionally, TrueNorth Steel's team of product experts and project management professionals are readily available to customize a TrueStair design to fit your project, ensuring a hassle-free experience from the start.

Since TrueStair systems are predesigned and prefabricated in a dedicated manufacturing facility, the quality of TrueStair surpasses that of conventional site-built stairs. In addition to proven quality, TrueStair systems allow for very efficient site assembly and installation. TrueStair flights and landings arrive at the jobsite in fully assembled modules. When set, TrueStair systems accept a variety of bolt-on stair rail styles also supplied by TrueNorth Steel. For additional aesthetic railing options, check out our TrueRail product designs.

Architects, contractors, and all construction project stakeholders will benefit from the ease and efficiency of the TrueStair system from design to installation. Owners and property managers will appreciate the proven quality and cost-effective advantages, especially when comparing to conventional stair designs.

"IT SAVES TIME OUT IN THE FIELD AND IN THE OFFICE. IT IS A LOT MORE SEAMLESS OUT ON THE JOB AND IN THE TRAILER."

— NED MALONE, PROJECT ENGINEER AT LANGLAS AND ASSOC.

WHY TRUESTAIR®

DESIGN READY

TrueNorth Steel created the TrueStair system to reduce lead-time on projects by streamlining the design and engineering process. Design standards meet regional and industry specifications and requirements.

IN-HOUSE LOGISTICS SERVICES

TrueNorth Steel's in-house logistics and shipping expertise allows us to control shipping and insure more accurate and on time delivery than other competitors on the market.

COST EFFECTIVE

TrueStair's pre-engineered design and ease of installation save on lead time and labor expense.

FAST AND EFFICIENT INSTALLATION

The stairs come preassembled in modules for fast and simple installation, plus the railings are bolted, eliminating the need for field welding. This makes for a clean and accurate attachment with no additional touch ups required.

INCREASED SAFETY

Each TrueStair system is designed to be safety compliant and meets the specifications outlined in both local and state codes.

COMPLETE STAIR SUPPLIER

TrueNorth Steel offers a wide variety of stair components – from stair nosings to cable infill – to complement your TrueStair system.

TRUESTAIR® OPTIONS

STANDARD STRINGERS

- Plate 1/4×10
- Plate 1/4×12
- Plate 3/8×10
- Plate 3/8×12
- MC12x10.6
- C12x20.7
- HSS 12x2x 1/4

STANDARD RAILS

- TrueRail
- Pipe
- Rod
- Tube
- Picket
- Wire Mesh
- Cable

STANDARD TREADS

- Concrete Filled
- Checker Plate
- Precast
- Grating

STANDARD FINISHES

- Grey Primer
- Galvanized
- Premium Powder Coat
