

STORMWATER MANAGEMENT MERCY HOSPITAL AMBULANCE BAY EXPANSION

LOCATION	SIZE	COMPLETION DATE	SCOPE
Coon Rapids, MN	72" CSP	2023	Aluminized Type II Perforated Stormwater Retention System

Mercy Hospital was expanding its ambulance bay and had new stormwater management needs. The project had a very specific timeline, and TrueNorth Steel's Blaine, MN location was key to fabricating the system when installation decisions were made. Overall, TrueNorth Steel provided a cost-effective solution and was able to meet the timeline demands.
