

COMMERCIAL SIBANYE BUILDINGS

| LOCATION | SIZE | COMPLETION DATE | SCOPE |
|--------------------|------------|-----------------|--|
| Columbus & Nye, MT | 3,048 Tons | 2023 | Structural Steel Miscellaneous Metals Engineering PEMB Components |

This project, spanning two locations in Montana, consists of a Structural/PEMB Cladding Hybrid Building (top & bottom right) and Process building (above). There was an intricate series of structural steel that supported that process on the inside of the 3 buildings in Nye. The group of buildings in Columbus had a structural steel frame with PEMB cladding system.
