LOCATION	SIZE	COMPLETION DATE	SCOPE
Medora, ND	96" x 80' 12 Gauge & 96" x 24" Connecting Band	July 2024	Aluminized Type II Step Bevel Connecting Band Half Headwall

Scout Energy Partners Oil Well, south of Medora, ND, needed to replace a CSP culvert on an oil field access road. The original culvert was installed during the first North Dakota oil boom in the early 1980's, which was also installed by Hlebechuk Construction. Despite tight time constraints, TrueNorth Steel was able to produce and deliver the pipe between two large rain events. Owner Hugh Hlebechuk noted, "The pipe went in so nicely for us; the band cinched up in 30 minutes, which does not happen often, and the pipe was round and straight!"
